

ARTIFICIAL INTELLIGENCE TIMELINE

THE HISTORY

1

1950

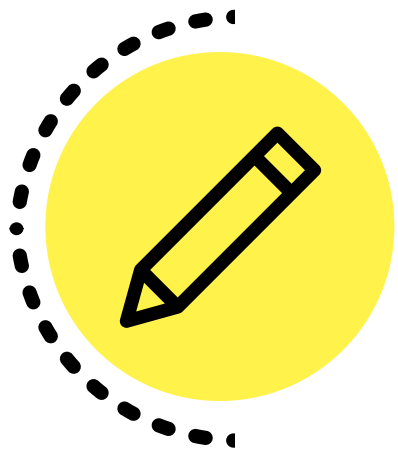

Neural networks and the coining of the terms artificial intelligence and machine learning.

2

1960

Eliza, the chatbot with cognitive capabilities, and Shakey, the first mobile intelligent robot.

3

1970 - 1980

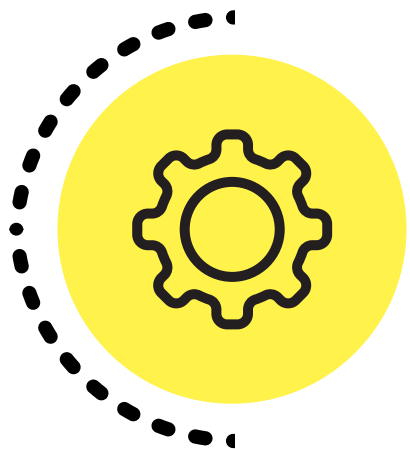

The first AI winter occurs as the capabilities of AI programs remain limited, mostly due to the lack of computing power.

4

1990

Speech and video processing. AI video processing is helpful in converting black and white clips into colorful videos.

5

2000

IBM Watson, personal assistants, facial recognition, deepfakes, autonomous vehicles, and content and image creation.
